

Statistical Local Areas in electoral divisions (2006 electoral boundaries)

This paper provides a concordance of Statistical Local Areas (SLAs) to Commonwealth electoral divisions, based on the 2001 Census. It incorporates changes to electoral boundaries brought about by recent electoral redistributions. The concordance allows SLA statistical information to be converted into electoral division totals.

Introduction

This paper provides a concordance of Statistical Local Areas (SLAs) to Commonwealth electoral divisions. It is based on the 2001 edition of the Australian Standard Geographical Classification (ASGC) as published by the Australian Bureau of Statistics (ABS)¹. The concordance incorporates the latest electoral boundaries following the recent redistributions in the Australian Capital Territory (December 2005), Queensland (November 2006) and New South Wales (November 2006).

The concordance was generated by processing the 2001 Census total population figures excluding overseas visitors in Census Collection Districts (CCDs) and allocating each CCD to the relevant SLA and the relevant electoral division of best fit. Where a SLA boundary was found to cross electoral division boundaries, a percentage was calculated to show the proportion of the total SLA population that is located in each electoral division. There are several cases where a SLA name is not unique therefore the full 9 digit ASGC code for each SLA is included in the tables. Some SLA names have also been abbreviated to fit into the tables.

This concordance will enable statistical information published on a SLA basis, by organisations such as the ABS, to be converted into electoral division totals. For example, the electoral division of Banks comprises approximately 45.9 per cent of the population of the SLA of 'Bankstown (C)', 5.5 per cent of 'Canterbury (C)', and 61.1 per cent of 'Hurstville (C)'.

The concordance is shown in two separate tables. The same information is contained in each table: Table 1 is sorted alphabetically by electoral division name; Table 2 is sorted alphabetically by the name of the SLA.

As mentioned, the information in this paper refers to the redistributed electoral division boundaries that will be used at the next election (expected later this year). When 2006 Census data at the CCD level becomes available later this year (the first release is expected in August 2007) then the concordance will be revised to incorporate this more recent population data. The concordance will also be revised to reflect SLAs from the 2006 edition of the ASGC.
